Industrial Statistician (f/m)

Location: Livingston, Scotland

Job number: 122735

For our manufacturing plants in Scotland, we are seeking an experienced Industrial Statistician to support our Fabrics Division in Livingston as well as our Electronic Products Division in Dundee. In this responsible position, you will support our global industrial statistics team in consulting our businesses. You will contribute to developing, optimizing and monitoring processes by using statistical methods, e.g. DOE and SPC. Furthermore it will be part of your job to consult, to manage data as well as to analyze, teach and present. Primarily you will support engineers and scientists but you will also collaborate with other members of the global statistical team. We rely on your sound knowledge and expertise when it comes to managing various projects with different teams at the same time. Beyond that, you will work together closely with cross functional teams such as Research & Development, Process Engineering, Laboratories, Quality and others. Additionally you will provide statistical support for manifold experiments, validations and sampling plans. Last but not least you will be responsible for utilizing and supporting statistical software (JMP®).

Ideally, the successful candidate has the following profile:

- Masters degree in statistics, a PhD in statistics is preferred
- Professional industry experience preferred
- Demonstrated ability to design experiments such as screening, split-plot, response surface, variability studies
- Ideally expertise in using JMP® statistical software
